PROFESSIONAL SUMMARY

Computer Science and Engineering student with a strong foundation in software development, web technologies, and problem-solving. Proficient in Python, Java, JavaScript, React.js, Spring Boot, Django, MySQL, and MongoDB, with hands-on experience developing web-based applications. Experienced in building projects involving attendance tracking and hospital management. Passionate about learning emerging technologies, developing scalable applications, and applying technical skills to real-world software development challenges.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C Programming.

Web: HTML5, CSS3

Frameworks: Spring, Spring Boot, Django, React.js.

Libraries: Pandas, NumPy, Matplotlib

Databases: MySQL, MongoDB.

Tools: Git GitHub VS Code.

EDUCATION

JSS Academy Noida, Uttar Pradesh

(B.Tech.) Lateral Entry – Computer Science & Engineering [Pursuing].

August 2025 – May 2028

CGPA: 7.7/10

Mahamaya Polytechnic of Information Technology (MPIT).

July 2022 – May 2025

Diploma in Computer Science Engineering

Percentage: 78%

SPRDIC, Siddharth Nagar.

July 2019 – May 2021

Higher Secondary Certificate (Class XII)

Percentage: 80%

SPRDIC, Siddharth Nagar.

Jun 2018 – May 2019

Secondary School Certificate (Class X)

Percentage: 80%

PROJECTS

AI Chatbot

Technologies: Python, NLP, Machine Learning

Built an interactive AI chatbot capable of understanding user queries and generating relevant responses.

Applied natural language processing techniques for text processing and intent detection.

Created a conversational interface with predefined responses and intelligent query handling.

Added error handling and fallback responses for unsupported user queries.

Student Placement Portal

Technologies: React.js, JavaScript, HTML5, CSS3, React Router

Created a responsive student placement portal frontend using React.js.

Implemented dedicated dashboards and interfaces for students, administrators, and placement-related activities.

Built reusable React components including navigation, sidebars, forms, tables, cards, and dashboard components.

Configured client-side routing and interactive UI features for managing students, companies, and placement information.

Crafted a responsive and user-friendly interface for streamlining placement-related activities.

Smart Attendance & Learning Platform

Technologies: *HTML, CSS, Java, JavaScript.*

- Engineered a web-based portal integrated with automated attendance tracking.
- Automated attendance marking by recognizing registered students through webcam integration.
- Built attendance reporting features including search, date filtering, and CSV export functionality

Hospital Management System

Technologies: *HTML, CSS, JavaScript, Bootstrap*

- Built a responsive web portal to manage patient records and appointment scheduling.
- Developed clean UI templates and input forms using HTML5, CSS3, and Bootstrap components.

ACHIEVEMENTS

-
- Participated in the **Smart India Hackathon (2023)**, demonstrating problem-solving and collaborative skills.
 - Earned a **3-Star Python Badge** on Hacker Rank showcasing proficiency in Python programming.

EXTRACURRICULAR ACTIVITIES

Photography Club Member JSSATEN	September 2025 - Present
• Participated in photography events and documented campus and cultural activities. • Collaborated with club members to organize photography exhibitions.	
Sports Committee JSSATEN	October 2025 - Present
• Assisted in organizing inter-college sports events. • Managed event logistics and scheduling while promoting teamwork and student participation.	

LANGUAGE

Languages: English, Hindi
